POLICY

Employees who:
have direct-physical contact with a DIAGNOSED case of scabies and prior to and within the first 24 hours of effective treatment for scabies are to follow the procedure below.

PROCEDURES

* Wear PPE (gloves and gown)

* Immediately, remove both upon returning the resident to their room

* Dispose of contained PPE by bagging.

* Wash hands, immediately, with plain soap and water

* Sanitize all surfaces after each resident with an approved sanitizing agent

* Sanitize the shower chair after each resident with an approved sanitizing agent

* Maintain stock of towels and face cloths in a covered condition.
