Bridgecreek Memory Care is located in the city of Lebanon, geographically positioned along the Santiam River in Western Oregon near the foothills of the Cascade Mountains in Linn County. This lovely small town of about 20,000 is also known as the home to the World’s largest Strawberry Shortcake, which has been served annually since 1909 at the historical Strawberry Festival. Thanks to our size (31 apartments with 58 beds) our belief is that our residents are part of our extended family. This results in intimate knowledge and understanding of each residents’ needs. Our staff is highly skilled and undergoes ongoing training, though we also emphasize the value of individual approach combined with a compassionate attitude. Being attentive to the unique requirements of an individual is equally important as expert clinical knowledge of caregiving.

We encourage you to visit Bridgecreek Memory Care and experience our welcoming staff and warm setting first hand.
The Bridgecreek Memory Care staff is highly skilled and knowledgeable in all aspects of care for Alzheimer's patients. Because of our on-going staff training program, management/nursing oversight of resident care and staff support, we have been able to foster our person-centered approach that creates the warm, cozy feel and friendly environment.

Beyond professional and personal care, we also work hard to create an active environment with many opportunities for life enrichment such as hands on workshops, church services, exercise groups, sensory activities and more. We want our residents to feel not only cared for, but also cared about through enjoyment of activities that contribute to the quality of their life.

The services we offer have been designed to enhance our residents’ quality of life and to provide them with as much comfort and support as possible, reducing anxiety enhancing their well being.

We at Bridgecreek sincerely believe that good nutritional care will help prevent health complications, prolong independence, and improve quality of life. Our dietary director creates a nutrient-balanced menu, by paying close attention to current dietary trends, as well as latest research on the affects of diet on Alzheimer’s disease and other memory deficit cause.

Bridgecreek Memory Care also offers short-term stay options (contingent upon occupancy and availability). The respite care program is geared toward a weekend, week, or even a month long stay, allowing family caregivers to take a rest, a vacation, or to spend some time attending to personal issues. We can also assist with coordination of end of life care. We are able to help families with the choice of the proper partnership and facilitate the transition of a resident to the best suited hospice agency.

There is a licensed beautician available in our salon, for both men and women's cuts and styles. We also have access to nail technicians and podiatrists upon request. Many other professional services can be arranged, as we work with several professionals from our area.

Currently, we have a total of 58 beds. Our apartments combine safety and functionality while providing each resident with their own comfortable living space. We maximize our resident's comfort throughout the entire facility by maintaining cozy, but uncluttered settings. The layout of our property is structured to maximize privacy and orientation, but also to prevent possible confusion caused by immense spaces. We also have a secure outdoor area; our private courtyard is the perfect place for visits with family or for our residents to enjoy the sounds and sights of nature. We also have many residents who enjoy planting flowers, pulling weeds, and doing other tranquil hands-on activities in the outdoors.
